

SPAUG

COMPUTERS & TECHNOLOGY

Vol. 1 No. 1 June 2015

To All SPAUG members

This is the first edition of our new electronic newsletter. In a effort to save costs, we are asking our members to choose this new format for receiving your PrintScreen newsletter. But if you still wish to receive the printed paper version, just let us know and we'll mail it to you, as usual, each month.

SPAUG Meeting

June 10, 2015

A Slice of Pi

Maurice Green, PhD

Over the past 10 years we have seen a burgeoning interest in small microprocessor boards which

can be programmed using a variety of software. They are being used by engineers for prototyping, by artists and by "do-it-yourselfers" for a wide variety of projects from music synthesizers to robotics. It is almost a "return ...

The meeting will be held at the Palo Alto Elks Lodge, 4249 El Camino Real, Palo Alto. Meeting registration starts at 7PM in the Lodge room on the second floor. The featured talks begins at 7:30PM.

All members and guests are invited to attend a NO-host dinner prior to our general meeting. Dinner will be at 5:45 PM at The Bistro located on the ground floor of the Elks Lodge.

Get Windows 10: Microsoft's biggest software upgrade in history begins

It's official: Beginning July 29, Microsoft will offer free Windows 10 upgrades to hundreds of millions of PCs.

Here's how the Get Windows 10 (GWX) program works:

What was already an **open secret** has **now been confirmed**. Microsoft will launch Windows 10 on July 29. (Previously, Microsoft had only committed to "this summer" as a launch date.) That date begins a one-year window during which free upgrades will be available to anyone running Windows 7 or Windows 8.1.

Looking Up Symptoms Online? These Companies are Tracking You.

Health data is some of the most private data you have. That a data reveals a lot about you. There's a reason that we have laws like HIPAA—unfortunately those don't apply here," Quintin said. HIPAA is the Health Insurance Portability and Accountability Act of 1996, and it forces the government and doctors to keep patient medical records secure and confidential. ...
